Reference:

We hereby confirm, that by using the DF48 formatting device by company Hoffmann s.r.o., we brought back to life and regenerated our 24V 375Ah battery, which was totally malfunctioning with a voltage of **0V**.
After gradual return of the voltage to the nominal value of 24V, we have increased the capacity to the value of **97%** / 364.7Ah using the formatting mode.
